

trēo™

Treo 270 has a built-in, backlit keyboard, making one-handed access to key functions easy and thumb typing fast—even in the dark.

The Handspring™ Treo™ 270 colour communicator does it all. Now you can have your phone, Palm OS® organiser, email, SMS text messaging, and wireless web in one amazingly compact and indispensable device—in full-colour.

full-colour screen

Browsing the Web, viewing photos and playing games just got a lot more fun...and more colourful. With the Treo's vivid colour screen, text and graphics are more readable.

mobile phone

The Treo communicator does everything a mobile phone does and more. That's because this dual-band GSM 900-1800 phone features a personal speaker phone and makes calling easier and faster than ever before thanks to full integration with built-in PhoneBook. Treo also includes all the features you would expect in a phone, like named speed dial, three-way calling and call history.

Palm OS organiser

With 16MB of memory, the rechargeable Treo 270 has everything you need to organise your life. It includes Date Book Plus, PhoneBook (an improved Address Book), To Do List and Memo Pad. And, you can run thousands of Palm OS applications and use HotSync® to backup, update, and transfer data between Treo and your desktop.

wireless messaging device

Send and receive SMS and email wirelessly. SMS text messaging has never been easier. Send a quick update to colleagues, get the info you need fast. Or send and receive email from virtually anywhere. Treo turns SMS into a powerful professional tool.

access to the Web

Access virtually any Web site from just about anywhere with your Treo 270 and Blazer®—the award-winning wireless Web browser. Get directions, confirm your flight, check the weather and see it all on the large, bright and colourful screen.

built-in, backlit keyboard

Finding contacts, dialing the phone, and entering data is fast and easy with the built-in QWERTY keyboard. And, since it's backlit, you can do it all—even in the dark.

Treo™ 270 features

full-featured mobile phone

- Call management features include large number dial pad, speed dial, three-way calling, call history, direct dial from your PhoneBook, caller ID and call waiting.
- Instant Lookup allows you to quickly find anyone in your PhoneBook. Just type the first initial and the first few letters of the last name.
- Personal speakerphone allows you to talk and listen hands-free.
- You can even lookup someone's contact details in PhoneBook or enter a new appointment in Date Book Plus while you are on the phone.

powerful Palm OS® organiser

- Includes all the classic applications—Date Book Plus, To Do List, Memo Pad, Advanced Calculator and CityTime world clock—plus a few new ones, like Instant Lookup and an improved PhoneBook.
- Runs the popular Palm OS—and thousands of Palm™ applications. Beam information between other Palm-Powered devices and transfer data from your current Palm OS device to your new Treo communicator with ease.
- Comes with a USB HotSync® cable so you can instantly backup, update and exchange information between your Treo communicator and desktop computer.
- Features a rechargeable battery, 16MB of memory and a fast Palm OS processor.

wireless messaging

- Send SMS (Short Message Service) text messages (up to 160 characters in length) to other SMS-enabled phones or any email address.
- Create SMS messages in an instant with shortcuts like saved recipient lists, boilerplate text and signature preferences.
- Read, delete and manage your business or personal email with optional Treo Mail™ service. Send and receive email as though you were at your desk.
- Send and receive email using the included email application to connect to your business and personal email accounts (POP3 compatible).

wireless web browsing

- Connect to the Internet with the built-in Web browser called Blazer®, wireless data services and an ISP account.
- With Blazer, web pages load an average of four times faster than with similar web browsers. You can even create bookmarks and cache pages for easy access.
- Access virtually any Web site—not just those optimised for mobile devices. Blazer supports multiple Web and wireless standards: HTML, WML (WAP), HDML, cHTML (i-mode) and xHTML.
- Surf safely. Blazer incorporates 128-bit SSL encryption technology.
